

Industrial Division

Do It Right The First Time.

LoVo Systems, Inc. Industrial Division is a design / build division that provides comprehensive mechanical, electrical, and systems integration services to industrial clients. Our skills and experience include manufacturing, water and wastewater treatment, automotive tiers 1, 2, and 3, food, pharmaceutical, and military facilities. We will design and build an affordable solution that is customized for your specific project and schedule requirements. We will provide a turnkey solution, and we will do it right the first time.

MECHANICAL

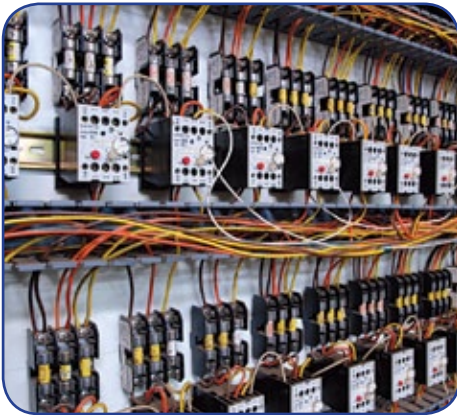

Our mechanical engineering staff is experienced in the design, specification, and installation of HVAC, process, geothermal, fire protection, and energy recovery systems. We have an extensive consulting engineering background and will work with you to design and specify the best and most cost effective solution for your particular application. We offer complete, turnkey mechanical installations that place all responsibility for both design and construction on a single entity. In addition to mechanical systems design and installation, we also offer consulting services such as energy modeling, life cycle evaluations, and feasibility studies.

- HVAC Systems
- Custom-engineered Process Systems
- Geothermal Systems
- Fire Protection
- Energy Recovery Systems
- Energy Modeling and Life Cycle Evaluations

ELECTRICAL

Our electrical services include both design and installation of power supply and distribution, commercial lighting, motors and motor controls, fire and life safety systems, security / access control systems, and video surveillance systems. We will provide either engineering services alone, or turnkey design and construction services to allow your organization to issue a single purchase order to place complete system responsibility with LoVo. With a professional engineer very experienced in electrical design and two master electricians on staff, LoVo is the solution to your project's electrical needs.

- Power Supply and Distribution
- Lighting
- Energy Evaluation, Modeling, and Monitoring
- Motors and Motor Control Systems
- Fire and Life Safety Alarm Systems
- Security
- Access Control
- Video Surveillance Systems

SYSTEMS INTEGRATION SERVICES

LoVo's systems integration services include the design and installation of SCADA and PLC / DCS systems, web-based monitoring and control systems, instrumentation, environmental compliance monitoring, control panel fabrication, and database / plant intelligence systems. With a strong background in manufacturing automation and water / wastewater treatment, LoVo is experienced in both discrete automation systems and process automation systems. We will work with your staff to design the best possible solution for your application regardless of the product used.

- SCADA Systems
- PLC and DCS Systems
- Web-based Monitoring and Control
- Instrumentation Systems
- Environmental Compliance Monitoring
- Control Panel Fabrication
- Industrial Automation
- HVAC Controls

About LoVo Systems

Do It Right The First Time.

Whether your needs require concept design and build or upgrading of existing equipment, LoVo has the expertise to implement a solution to meet those needs.

LoVo's primary goal is to use our extensive customer relations experience to provide the best service possible to our customers at a competitive price. Anything less than 100% customer satisfaction is not acceptable.

We understand that, due to several factors, not all projects go 100% as planned. However, the staff at LoVo is dedicated to providing customer service at the highest level possible. We care about your business, and our goal is to become business partners with you. In order to achieve this goal, we understand we have to provide services within the time line and price range we quote, as well as being available in a timely manner for service calls. Again, anything less than this is not acceptable.

Our Quality Control Department is the backbone of our company. We believe with the proper training and attention to detail, our motto, *Do It Right The First Time*, enables us to achieve our goal of 100% customer satisfaction.

We look forward to doing business with you.

Ben L. Murphy, P. E.
